

FEDERAL IDENTITY PLATFORM ENHANCEMENTS

XTec continuously evolves and enhances our secure identity platform with innovations and updates designed to support mission-critical operations across our federal and commercial partners.

CUSTOMER COLLABORATION & SUPPORT

We hosted a successful working session on June 14 to gather direct customer feedback

New look and functionality enhancements for key federal agencies:

- Better customer experience
- Expedited loading times
- Modern look with a smart design and clean navigation

Enabled DEA self-registration for DAC Credential Requests

- This allows DEA PIV cardholders to leverage their existing PIV identity, proofing to self-register for a Yubikey token
- More control, more flexibility
- Streamlining the onboarding experience
- JUDFAC IP changes implemented to support continued integration with key federal agencies
- Staying resilient against emerging threats, and for FedRAMP adherence

SECURITY, CREDENTIALS & COMPLIANCE

- Expanded SFLHIDTA certificate support — now capturing enhanced biometrics like eye/hair color across PIV & PIV-I
- Addressed multiple CVE vulnerabilities and implemented concurrency enhancements
- Improved USAGM SRIP integration and content signer support for USAGM + NSF

USER EXPERIENCE & ACCESS CONTROL

- Enhanced FRB Appointments Login privilege enhancements
- Improved document viewing capabilities across our platform
- Streamlined UI for self-service and administrative actions

CONTACT

Our customers deserve to experience great performance, security and innovation. Now you can navigate effortlessly...

Let's talk about how we can help modernize your agency's identity management.
